

## myCHP campaign: Case Study Submission Form

myCHP is a community of users, installers, manufacturers who enable and are committed to using combined heat and power (CHP) technologies to meet the energy needs of their businesses and homes.

The campaign seeks to put a human face on the combined heat and power sector. COGEN Europe will use the myCHP campaign page on its website to highlight people's stories and personal experiences of cogeneration, showcasing the many different ways in which CHP plays a role in people's daily lives. The stories will be presented as short case studies featuring individuals using CHP as part of their everyday experience. The website section will be complemented by a dedicated Twitter account and will feature in COGEN Europe's wider communications.

To get an idea of what the case studies will look like, the example below of Steen Slaikær, Owner and CEO of Hvidbjerg Strand, is one of the first myCHP case studies. If you have a personal myCHP story to tell, please complete and submit the form to COGEN Europe for consideration (accompanied by a photograph that fires the imagination).

To find out more about the campaign, please contact [COGEN Europe Communications Manager Andrew Williams](#).

**Please submit your contribution via email using the form below.**

COGEN EUROPE

Our motivation is to get as low energy bills as possible. Due to our business as a 5 star camping site with wellness and water park, it is important that we can run it as efficiently as possible, so we provide our guests with good experiences. The daily use is very easy – there is actually no handling, and the service from EC Power is excellent, so we are very happy with our CHP unit.

Steen Slaikær, Owner and CEO of Hvidbjerg Strand  
Blaavand, Denmark

This is myCHP experience. Share your story today and join the myCHP family.
